

**ABSTRACT**

This invention relates to a locking device<sup>1</sup> that immobilises a pedal 10 of the vehicle and the steering wheel 11 to render the vehicle inoperative. The invention encompasses a method for installing the locking device 1. The locking device 1. 5 includes a hooked metal rod 2 for attachment to a pedal 10 and a metal chain 7 linked to the rod 2. The chain is secured to the steering wheel 11 by wrapping the chain 7 tightly around the steering wheel 11 and securing the chain 7 to itself. The steering wheel 11 and pedal are thereby immobilised and prevented from moving relative to each other.
